Gentlemen:

RE: ML 7920—Oil, Gas, and Hydrocarbon

The above-numbered lease is beyond the primary term and may only be extended annually by ongoing operations and commercial production.

No commercial production operations have occurred upon the lease during the past year. The lease will terminate on December 31, 1994. You may remove from the site all stockpiled tar sand material for which royalty has been paid.

You should immediately commence reclamation of the mine site in order to take advantage of seasonal moisture for seeding. Please contact me if you have any questions regarding the reclamation plan or seed mixtures. The Division holds Surety Bond No. 71-0130-10505-81-9 to ensure reclamation success.

Sincerely yours,

JOHN T. BLAKE
MINERAL RESOURCES SPECIALIST

JTB/tdw
